MONETARY

This and Labor Question the Disturbing Elements.

KEENE POSITION WEAKENS

Actual Developments in Railroad World Have Been Insignificant, Though There Have Been Some Very Interesting Rumors Afloat.

NEW YORK, March 28 .- The chief disinfavorable monetary and labor features. more complicated, with the result that the reaction, says the Financial Age., This had hoped, although it must be admitted the elevation of prices that was noticeable during the preceding week. In money the most disquisting development was the appearance of an apparently urgent demand for currency from out-of-town points for the purpose of fortifying reserve accounts in other cities. Inasmuch as the drain from the interior was understood to have been checked, with the expectation that the return flow might set in at any time, this new development dampened spooulative ardor materially. There are many Wall Street commentators who have expressed great surprise that the market does not reflect the recent "good" bank statement; they lay particular stress upon the fact that the surplus reserve has been increased, but neglect to go into details as to the cause thereof. The increase of surplus reserve by the excessive withdrawals of deposits, such as has occurred during the past few weeks, cannot be construed in any other than an unfavorable light. What makes this withdrawal the more significant is the fact that deposits grew this year by \$30,000,000 in the first seven weeks, and fell in the following weeks by \$30,000,000, of which the sub-treasury took nearly half. Deposits are in the control of the depositor, and he has been compelled to reduce them in the most embarrassing manner to the local institutions.

DEMANDS OF LABOR.

The demands of labor are daily becoming more persistent, and much concern is expressed regarding the outcome of the many threatened strikes on the various railroads. No sooner does one corporation seuceed in pacifying its employes than another system is confronted with union demands, many of which are unjust and some indeed, arbitrary. In the face of these incressant labor troubles investors may well ask when an arrange. money the most disquieting development was the appearance of an apparently ur-

ace of these incessant labor troubles inrace of these incessant labor troubles investors may well ask when an arrangement can be effected between employers
and employes whereby peace may be assured, if only for a stiplated time. The
findings of the Anthracite Strike Commission have unfortunately had the effect
of inspiring labor agitators with a desire
to empulate the example and obtain the
fame of the leader of the Pennsylvania
coal miners, who, if he has not achieved
an unqualified victory, has at least been
more successful than has the leader of
any other great strike during the past
half dozen years. The corporations are in
many cases willing to treat with their
employes in regard to increased wages and
similar demands, but they insist in their
refusal to recognize the unions, knowing
that to do so would not only establish a
precedent injurious to their interests, but
would place them in a position where
they would be constantly menaced and
dictated to by men whose chief interest
in labor lies in their individual pockets
and in the notoriety which they can
achieve at little cost to themselves, although at a great sacrifice on the part
of their followers.

SOUTHERN PACIFIC.

The Southern Pacific fight continues to
attract considerable attention in financial
circles, although the opinion is daily becoming more prevalent that the ostensible
object of the pool, or rather of the pool
leader, will fall of accomplishment. The
policy pursued by the Keene party is receiving much consure from conservative
interests, who are inclined to the belief
that this policy is not approved by a
large number of those who entered into
a speculative contract with Mr. Keene,
but who would rather suffer a monetary
loss than antagonise the controlling intereats in the Southern Pacific, and who vestors may well ask when an arrange-ment can be effected between employers

This City.

Local fandom will be interested to learn that 'Squire Charley Donati is exerting every effort to bring two of the National or American League teams to Richmond for a series of three games next month, in which event the people will be given an opportunity of witnessing some of the fastest base-ball ever seen on a diamond in Richmond.

President Donati is in negotiation with the Now York and Brooklyn National League aggregations, the former resting new at Savannah and the latter headed south. Whether he will be successful it still in doubt, the Brooklyn management being undecided as to the advisability of such a match. "Mugsy" McGraw, of the Glants, is willing and anxious for a sories of games with some fast aggregation, and it is quite probable that the two Gotham teams—American and National Leagues—will meet in Richmond to settle a mooted question as to which is the superior.

At present the New York American League crowd are at Atlanta, but they will start North about the same time as does the bunch in Savannah. Nothing would be more natural or remunerative than a stop-off at Richmond, and it looks as if this will be arranged.

FEW DEVELOPMENTS.

Actual developments in the railroad world have been insignificant during the past week, although considerable interest centered in the reports of the acquisition of the New York Central by the Pennsylvania interests. Both parties have denied that there has been any change of control, and even if there is any foundation for these frequently recurring rumors it would have little significance, as it is well known that Pennsylvania and New York Central have long been hand and glove, and that the owners of these two great systems have each acquired a considerable block of stock in the others property. Should any change in control

considerable block of stock in the other's property. Should any change in control occur, it would be with the full consent of the present dominant interests in Central, and in such an event the present policy of the road would undoubtedly be strictly athered to.

(Special to The Times-Dispatch.) PITTSBURG, March 28.-A sensation was created here yesterday by the announcement of the marriage of Miss Elnora Lockhart to Dr. William S. Flower, both of this city. It was a run away match, but why they sought this means of becoming man and wife can-

means of becoming man and wife cannot be ascertained. The pair is now in Philadelphia, while the only relatives of the bride and bridgeroom in the city at present is a sister of the bride, who refuses to talk.

Dr. Flower and Miss Lockhart met by appointment and quietly slipped away to the residence of the Rev. Dr. E. P. Cowan in the East End. They were accompanied by Miss Mildred Schlinneller and Miss Mercedee Flower, the latter a sister of the bridesroom, who acted as bridesmalds. The bridesroom was accompanied by Norman Richardson.

After the knot had been tied the couple left at once for the East, going directly to Philadelphia, whence they will proceed to New York.

None of the members of the bride's family was present at the ceremony, and it is said that they knew nothing of it.
